

HR 6

Procedure

Use your word bank to help you label this cross section of Earth with as much detail as possible.

Previously, you learned about convection in gases and liquids. In this unit, you have learned how convection and the movement of Earth's plates are connected. How is this unit related to the rock cycle?

 When rocks melt and then recrystallize they form igneous rock. No new rock material is created and no rock material is ever destroyed. no new rock material enters the system and no rock material ever leaves it.
